Match the short passages with their possible titles. Circle one correct answer: A, B, C or D.

| | | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>A. In the 19th century, an ingenious invention changed the way we travelled – the bicycle! Picture this: a simple yet powerful two-wheeled contraption that allowed people to pedal their way to new horizons. In 1817, Karl Drais invented the first bike, known as the "running machine." Over time, the bicycle evolved into the sleek and speedy rides we know today.</p> | <p>B. Fast forward to the early 20th century, and enter the roaring engines of cars! Inventions like the Model T by Henry Ford transformed the way people moved from place to place. Cars became symbols of freedom and adventure, allowing families to embark on road trips and explore distant destinations. The evolution of cars revolutionised</p> | <p>C. As the 20th century progressed, another marvel took flight – aeroplanes! The Wright brothers, Orville and Wilbur, soared into history with the first powered flight in 1903. What was once a dream became a reality, and air travel became a revolutionary way to connect distant lands. From propellers to jet engines, aeroplanes brought people closer</p> | <p>D. Venturing beyond Earth, the mid-20th century marked the era of space exploration. Rockets, like the Saturn V, propelled humans into the vastness of space. In 1969, astronauts Neil Armstrong and Buzz Aldrin set foot on the moon, showcasing the incredible possibilities of space travel. Rockets transformed our understanding of transportation, reaching heights and distances once</p> |
